

David wrote that "Heavens Declare the Glory of God" in Ps 19:1.

We consider the wonder and glory of the universe
but we must realize that this is the **dying** universe,
the one that man broke through his sin.

I picture it somewhat like a perfect egg that is dropped
and begins flowing out from the center,
expanding in its deterioration.

Think how wonderful the perfect universe would have been!

But the power of God through the sacrifice of Christ
heals our souls

and also is able to renew the entire universe.

We are here to worship the wonderful power of that Love

which gives us salvation
and a home with God forever.

Cup: think of the blood pool spreading out ([link to broken egg](#))

Contribution: God will fix everything, but we can contribute to help repair some of the brokenness
